Subject: Drums of Cuttings at Vienna St.

I have reviewed the results again, consulted with Claude Terry and the Mayor. They are comfortable with us dumping the contents back onto the landfill. The question is....who wants to do it?

Shanieka, if the empty drums are not already dealt with, Brian can get someone to come pick them up at the same time they are emptying the cuttings(which will yield more empty drums). If you have already dealt with the drums and stored them for later use with another project, please reflect the cost credit in the next monthly status financial report.

Brian, who would actually go down there from SEDS and take care of this matter? Can you provide me with a timeframe?

Thanks!

Carolyn Thompson,
Remedial Project and Site Assessment Manager
South Site Management Branch, EPA Region 4
